

Host universities must agree to a number of terms imposed by their Communist Chinese minders: 1) No criticism of the Chinese government; 2) No mention of Taiwan as a separate nation; 3) No criticism of China's harsh treatment of Hong Kong dissidents; 4) The 1 million Uighurs in "training camps" are not mistreated; 5) No mention of the Wuhan bio-lab origin of the Covid-19 virus; 6) Review/censorship of campus guest speakers on China-related topics, and 7) The university must crack down on China-critics on campus or else China will withdraw their tuition-paying national students.

The tide is turning against these propaganda plants in our institutions. The U.S. State Department wants the operators to register as foreign agents of the Peoples Republic of China. They will have to report on PRC personnel, recruiting, funding, and the extent of operations in the U.S. When only one perspective is permitted in these "cultural exchanges," they cease to be educational and become propaganda mills.

CCP Ties to Elected Officials in the U.S.

CCP influence over elected officials is brazen. For 19 years, Senate Foreign Relations Chairwoman Dianne Feinstein employed a CCP mole, Russell Lowe, as her chauffeur. In between marriages, Eric Swalwell – a member of the House Permanent Select Committee on Intelligence -- was getting campaign support and was allegedly involved in a honey trap with Chinese spy Christine "Fang Fang," who disappeared once she was outed by the FBI. Senate Majority leader Mitch McConnell is married to Elaine Chao whose family operates the Foremost Group, the largest bulk shipping conglomerate organized in the U.S., operating a fleet of 33 ships. Seventy-two percent of their business is with Communist China, which could only happen with close ties to the CCP. Chao has been U.S. Secretary of Transportation since 2017. Recently, a laptop computer abandoned by Joe Biden's son, Hunter, revealed that a \$10 million payment was being arranged with a Chinese businessman, Ye Jianming, for "introductions," with 10% to be

funneled to "the big guy" – Joe Biden. This particular arrangement was never executed. In 2018 Ye Jianming was charged in China with bribery in an unrelated venture.

The Lao Gai system:

A single bullet to the head or heart has historically been the favored method to execute prisoners in Communist China. The executed woman: Lu Jinfeng.

Communist CHINA can't wait for a Biden Administration

CCP Influence in the 2020 Election

The Chinese Communist Party (CCP) backed BLM leadership has stated that their number one goal was the removal of Donald Trump from office. So it doesn't take a genius to deduce that CCP most likely had a finger in the 2020 election. And indeed they did. CCP would much rather deal with a Biden administration than another tough four years of President Trump. Led by **Liberation Road** and their sister organizations, they targeted seven swing states. Some of it legal some not so legal. Certainly door knocking, texting and phone calling on the surface is legal. Millions of phone calls, texts and doors knocks were done in the seven swing states by **Liberation Road** backed organizations. Where it gets murky is whether CCP was paying **Liberation Road** to set up huge and sophisticated campaigning efforts to help swing the election to Biden. All of this and more has been going on for years and it is time to put a stop to the brutal CCP regime and its influencing of U.S. elections. (See References)

Three major communist organizations operating in the US are:

Communist Party USA, (CPUSA) – Has been operating in the United States since 1919 and is the oldest of all the communist organizations here in the US. Originally it took its orders from the USSR. Although now it is aligned with China, Cuba and other nations hostile to the United States.

Freedom Road Socialist Organization, (FRSO) – Was formed in the US in 1985 and is a Marxist-Leninism organization. Frank Chapman is their current leader and are based in MN and IL. Keith Ellison, the AG of MN is very close to this group. They are very active in CA, IL, MN and TX. Many of the protests throughout the US in the summer of 2020 were backed by FRSO. They take their orders from the Chinese Communist Party (CCP).

Liberation Road, (LR) – Was formed in the US in 1985 with FRSO and is a Marxist organization. In 1999 they split away from the FRSO to form their own organization. Like FRSO, they get their orders from CCP. They are very active in CA and northern and southern states. LR along with FRSO are responsible for organizing all of the riots in the US during the summer of 2020.

Another organization that merits mentioning is the **Chinese Progressive Association** (CPA). Founded in 1972 in San Francisco, CA. Alex Tom is their leader and they take their orders from the CCP.

All of these groups are closely connected to BLM and Antifa. BLM's three founders are all Marxists. Alicia Garza, Patrisse Cullers and Opal Tometi are well trained by the CCP. Needless to say FRSO, LR, BLM and Antifa get a lot of financial backing not only from George Soros, but also the CCP.

China's Confucius Institutes – Hypocrisy and Propaganda Galore

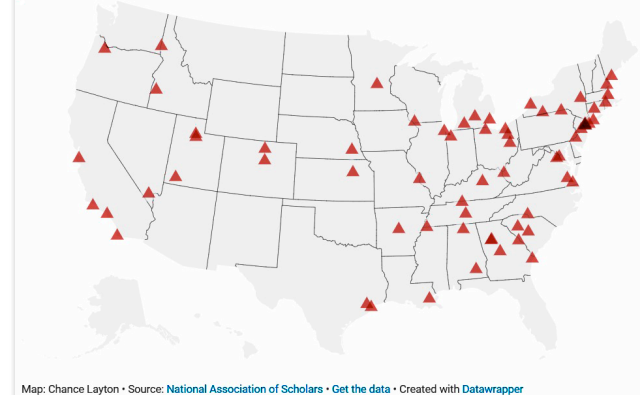

Communist China has established 66 "Confucius Institutes" on college campuses and more than 500 similar programs in elementary and secondary school classrooms across the United States. Banking on the recognition and renown of the 6th Century BCE Chinese philosopher, the CCP uses these programs to teach Chinese language and instill pro-Communist China narratives in young American students. To encourage these programs, Communist China sometimes supplies the instructors, and they often give generous financial incentives to the university leaders. Recently, an Australian university vice chancellor was awarded a \$148,000 bonus for meeting the Institute's performance goals.

Of course, the philosophy of Confucius is eons and worlds apart from Chinese Communism. Confucius is sometimes called the father of universal education and professional teaching. His writing helped establish the basic moral, ethical, and social norms of Chinese society. He was also critical of the nobility and their harsh rule. The Communist Chinese tried to erase Confucianism from modern China, but it was

too deeply engrained. Here are just a few contrasts between Confucianism and Chinese Communism:

Confucius Institutes in the United States

Confucianism

- Loyalty to family and elders
- Young should respect age and experience
- Individual face-saving
- Superiors should set example for inferiors
- Peasant farmers respected
- Free enterprise works best
- Diversity of opinion encouraged

Chinese Communism

- Loyalty to the state
- Young must reject "the old ways"
- National face-saving
- People protect the state from disgrace
- Merchants and generals respected
- Collective farms and communes (failed)
- Harmony trumps freedom of thought
